Amazing large villa 'mansion' in Bigastro, Alicante. This wonderful house has way too many extras to mention them all! We will list the most important specifications: built in 2002, completely custom made by the current owner, 450m2 build size, large private pool, 650m2 plot, built to last very high quality materials were used during construction, a lot of beautiful woodwork custom made, central heating throughout the whole property, awnings, A-C all over the place, stunning seating area in the entry hallway, all double glazed windows and sliding doors, balconies overlooking the private patio.

The first floor (ground floor level) consists of a large entry hallway with seating area, then on the right we do have a large kitchen plus summer kitchen in that patio. Further down the hallway you will walk straight into the huge living room with fireplace, woodwork details, heating, AC, direct access to a large back terrace through glazed doors. Further down the living room there is an entry to the master suite. Big walk in closet in the middle, bathroom on the right side and bedroom on the left. Going back to the main entrance and then straight left there is an office space which can be turned back into a bedroom, a bathroom in the middle and two large bedrooms with closets that were custom made. Once all rooms have high quality double glazed windows, central heating and AC units.

Going to the basement of this property we will enter first the mini bar area, followed by a large open space which can be considered living room two (now they call it the playroom), it also has its own fully equipped kitchen and storage room at the back. This second living room has direct access to the interior patio as well. Ideal for lots of natural light and fresh air coming in. Going back to the staircase there is a large bathroom, to the left is an utility space and from there on we will enter the enormous garage with space for at least 6 cars. Each room has access to the interior patio. The garage ramp has been beautifully finished by a natural stone walls on each side.

This villa already has another layer on top of the villa for an extra 200m2 to be finished if anyone wants to.

Structure and roofing is done. Just the inside needs to be finished.

Spectacular property, photos don't do justice! This needs to be seen in person.
